

COOKIE POLICY

Last updated October 01, 2022

This Cookie Policy explains how Interface Networkworld LLC ("**Company**", "**we**", "**us**", and "**our**") uses cookies and similar technologies to recognize you when you use our mobile application. It explains what these technologies are and why we use them, as well as your rights to control our use of them.

In some cases we may use cookies to collect personal information, or that becomes personal information if we combine it with other information.

What are cookies?

Cookies are small data files that are placed on your computer or mobile device when you visit a mobile app or website. Cookies are widely used by website and mobile app owners in order to make their websites and mobile apps work, or to work more efficiently, as well as to provide reporting information.

Cookies set by the mobile App "I.F Present King&Queen" owner (in this case, Interface Networkworld LLC) are called "first party cookies". Cookies set by parties other than the website owner are called "third party cookies". Third party cookies enable third party features or functionality to be provided on or through the website (e.g. like advertising, interactive content and analytics). The parties that set these third party cookies can recognize your mobile both when it visits the mobile app in question and also when it visits certain other applications.

Why do we use cookies?

We use first and third party cookies for several reasons. Some cookies are required for technical reasons in order for our Mobile App to operate, and we refer to these as "essential" or "strictly necessary" cookies. Other cookies also enable us to track and target the interests of our users to enhance the experience on our Online Properties. Third parties serve cookies through our Mobile App for advertising, analytics and other purposes. This is described in more detail below.

What about other tracking technologies, like beacons?

Cookies are not the only way to recognize or track visitors to a website or mobile app. We may use other, similar technologies from time to time, like web beacons (sometimes called "tracking pixels" or "clear gifs"). These are tiny graphics files that contain a unique identifier that enable us to recognize when someone has used our application. This allows us, for example, to monitor the traffic patterns of users from one page within a application to another, to deliver or communicate with cookies, to understand whether you have come to the application from an online advertisement displayed, to improve mobile application performance, and to measure the success of e-mail marketing campaigns. In many instances, these technologies are reliant on cookies to function properly, and so declining cookies will impair their functioning.

Do you serve targeted advertising?

Third parties may serve cookies on your computer or mobile device to serve advertising through our Websites or Mobile Application. These companies may use information about your visits to this and other websites and mobile applications in order to provide relevant advertisements about goods and services that you may be interested in. They may also employ technology that is used to measure the effectiveness of advertisements. This can be accomplished by them using cookies or web beacons to collect information about your visits to this and other sites in order to provide relevant advertisements about goods and services of potential interest to you. The information collected through this process does not enable us or them to identify your name, contact details or other details that directly identify you unless you choose to provide these.

How often will you update this Cookie Policy?

We may update this Cookie Policy from time to time in order to reflect, for example, changes to the cookies we use or for other operational, legal or regulatory reasons. Please therefore re-visit this Cookie Policy regularly to stay informed about our use of cookies and related technologies.

The date at the top of this Cookie Policy indicates when it was last updated.

Where can I get further information?

If you have any questions about our use of cookies or other technologies, please email us at interfacenetworkworld@gmail.com or by post to:
